

Heavy Weapons Sight

TECHNOLOGY

- Rugged red-dot sight (range = 1500m)
- Custom optics design and fabrication
- Unique anti-dust, anti-shock design
- Reticle viewable through wide angles
- Adjustable brightness, low-power LED
- Tailored to the M134D minigun

SCHEDULE

- First OEM prototype delivered to Dillon Aero in late 2009
- Successful optics demonstration
- Design for Phase 2 optics
 - “Widescreen” form factor
 - Brighter illuminator
 - Optional LRF integration

IMPACT

- Enables first round on target
- Improved opening burst accuracy
- Saves weight of “walking in” rounds, extending flight time and/or combat load
- Saves cost of excess ammo

- Please contact Dillon Aero for information
