

Time-based Idea Visualization UI

TECHNOLOGY

- Silverlight controls
- SOAP web services
- LINQ-SQL database back end
- UI configurable by user on the fly
- Clickable, re-balancing node graph

SCHEDULE

- Work for Microsoft performed under contract to Blue Sky Scientific, LLC
- Late 2008 – early 2009 effort
- Successful delivery and deployment

IMPACT

- “HistoryView” UI used in ThinkWeek 2009
- Enabled Microsoft ThinkWeek participants to see evolution of submitted ideas over time
- Illuminated parent-child-sibling relationships among ideas
- Visual representation of both temporal relationships as well as connection strength
